

# Lens Coatings

## ● Kleencoat

Hard Hydrophobic

Multilayer antireflection coating with excellent visual performance and durability with easy clean top coat

## ● Kleencoat Plus

Hard Hydrophobic Oleophobic Antistatic

With Kleencoat performance and additional layers provides an antistatic, ultra-smooth surface. This delivers superior scratch resistance and offers a 2-year scratch warranty

## ● Kleencoat Blue

Hard Hydrophobic

Filters blue light from selected wavelengths to improve comfort and protection for digital device users and night driving

## ● Kleencoat Drive

Hard Hydrophobic Oleophobic Antistatic

Improves night time glare from multiple sources, headlights, traffic lights. As effective as Kleencoat Plus during the day

## ● Kleencoat Sun

Hard Hydrophobic

With Kleencoat performance on the rear surface of sun lenses

## ● Blue Protect System

- Blue protect system uses in mass UV +420 to cut harmful blue light up to 420nm letting the good blue light pass through the lens
- Because the filter is part of the lens monomer the filter has a longer life compared to those using a coating
- Blue protect provides 100% UVA & UVB protection

### Customer Benefits

- Added protection when using digital screens
- Can help with tiredness associated with blue light disrupting the body's natural rhythms
- Recommended for people who spend a lot of time outside
- Reducing reflections and increases contrast when night driving

UVA UVB	99.1% Abs
400nm Blue Light	99.1
